FSP Fortron/Source Launch Everest 800/1010W

FSP Fortron/Source would like to announce a new addition to their high watt range of power supplies - the Everest 800 and 1010W.

Compatible with the newest Intel and AMD multi-core CPUs, not to mention Nvidia's Dual GeForce 8800 Ultra and ATI's Radeon™ HD 2900 XT, the Everest series is ready for the newest technology on the market.

Another key feature of the Everest series are the modular cables, ideal for users who need more flexibility and better air flow in their PC case.

*The Everest 800/1010W series are simply PSUs
for users who need serious Gaming Power!*

Features
